OBJECTIVE

To leverage my expertise in **Full-Stack Development** and **Machine Learning** to develop innovative, scalable solutions that drive efficiency and enhance user experiences. Passionate about solving complex problems, my aim to deliver impactful solutions while expanding my skills in a collaborative environment.

EDUCATION

Bachelor of Engineering in Information Technology

PES Modern College of Engineering, Pune

2023 – Current

CGPA – 9.70

Diploma in Computer Engineering

Government Polytechnic, Jalgaon

2020 - 2023

Percentage - 89.11%

SKILLS

Programming Languages & Framework: Java, Python, SQL, Django, React, Flutter, DSA

Machine Learning & Data Science: TensorFlow, scikit-learn, Data Analysis

Tools, Platform & Soft Skills: Git, GitHub, VS Code, MySQL, Problem-Solving, Team Collaboration, Communication

Languages: English (Proficient), Hindi (Fluent), Marathi (Native)

EXPERIENCE

Full Stack Developer | Industrial Training

Nik Enterprises Pvt. Ltd.

Aug 2022 - Oct 2022

Jalgaon, Maharashtra

- Developed and Designed the Result Management System (RMS) using HTML, CSS, and JavaScript for the frontend, creating an intuitive user interface and ensuring responsive design.
- Implemented Backend using PHP and MySQL, integrating with the database to manage student data and results, improving data storage and retrieval processes
- Deployed the Product on a live server, ensuring smooth operation in a production environment, providing real-time access to users, and optimizing server performance for live functionality.

PROJECTS

Quick Attend (OpenCV Face Recognition Based Attendance)

- Created an automated attendance management system using facial recognition technology for accurate student attendance tracking. Developed with Python, OpenCV, and machine learning models to improve efficiency and reduce manual errors by 30%. [GitHub Repo](#)

Personal Portfolio.

- Showcasing a collection of my best web development and machine learning projects, demonstrating my skills in HTML, CSS, JavaScript, Django, and Python. Explore my work and problem-solving capabilities through interactive, responsive, and user-focused designs. [Explore My Work](#)

Health Care Chatbot.

- Developed an AI-powered chatbot for the healthcare industry, designed to provide users with quick answers to medical inquiries, improving response accuracy by 20% and symptom checking. Utilized Python, NLP techniques, and API integrations to ensure accurate and efficient responses. [GitHub Repo](#)

EXTRA-CURRICULAR ACTIVITIES

- Smart India Hackathon 2024:** Contributed to a solution-oriented national competition.
- Attended **Google's Arcade Program** and **Cloud Bootcamp**.
- Regular participant in **GeeksforGeeks DSA contests**, enhancing problem-solving skills.
